Hepatitis C (Chronic)	HEP C (C)

# 2023 CLARK COUNTY COMMUNICABLE DISEASE REPORT

## Quarter 1 - Total Confirmed & Probable Cases January to March

### OUTBREAKS

Outbreaks*	YTD #
Coronavirus (COVID-19)	2

### DISCLAIMERS

This report contains a selection of reportable conditions with inclusion based on public health significance and frequency of occurrence. The case counts reflect confirmed and probable cases, for all process statuses. These numbers are not final, and are subject to change as confirmatory testing and case follow-up are completed. Case counts should not be considered final and are subject to change. In addition, case counts reflect only what is reported to Clark County Health Department.

If an individual with an open communicable disease case moves while their case is still active, their case will be counted towards the county of current residence. Example: If Clark County follows up on a Tuberculosis case for 6 months, but then the case moves to Taylor County for the remaining 6 months of treatment, the Tuberculosis case count will be reflected in Taylor County's case counts, not Clark County.

\*Outbreak numbers reflect only what is reported to CCHD. Outbreak definitions vary based on the type of disease and setting of the outbreak.

#### Disease Reporting
