Retail Food Establishment - Serving Meals: License Complexity Calculator

Retail food establishments serving meals are placed into four categories based on food safety risks. A retail food establishment serving meals that are prepackaged and TCS only prepares individually wrapped, single food servings, which are packaged off-premises by a licensed processor, with the on premise activity limited to heating and serving. EXAMPLE—whole frozen pizzas.

The other three categories (simple, moderate and complex) use a point system to determine the license complexity category. Use the chart below to calculate your license complexity category.
